WHAT do we do

We offer charging-as-a-service: customers can use the ChargeFUZE app to rent portable phone chargers from ChargeFUZE charging stations, and charge up on the go.

We believe that in today's digital landscape, people should always be enabled by their devices. ChargeFUZE lets people stay connected in an online world, on the go, and keep doing what they love. No more low battery anxiety.

HOW do we do it

Customers can locate our charging stations in-person or through our mobile app. To rent a charger, simply download the app and scan the QR code on ChargeFUZE charging station to release a portable charger.

Pay just \$0.50 for the first 30 minutes, and only \$0.25 every 30 minutes after until you return the charger to any ChargeFUZE charging station. With a ChargeFUZE portable charger, users can charge phones 1.5 - 2 full times.

WHERE we are

ChargeFUZE provides customers with an ecosystem of portable chargers that they can access in both small retailers like bars and coffee shops, as well as any high traffic private or public location where visitors spend long durations of time and have no ability or access to charge their cell phones. For example: sports stadiums, concerts, malls, museums, subway/metros, public buses, university campuses and libraries, convention centers, casinos, festivals, nightclubs, and restaurants.

WHY do we do it

Enjoy Longer: No one should have to cut short their family's Saturday at the mall or a night out with friends because their battery is running low.

Improve Safety: No one should feel unsafe while riding the bus or subway home from work. Students should never walk home from the library or campus with low or no phone battery.

Never Miss a Moment: Everyone should be able to enjoy a concert, sporting event, festival, or day at the museum, park, or beach without suffering the anxiety of worrying about their phone dying.

WHO stands to benefit

Landlords/ Businesses: Free service for businesses to offer guests, additional amenity to offer guests, drive traffic, increase sales

ChargeFUZE users: Users benefit from the utility of power as an always accessible service and at their convenience for a very affordable cost

Venues / Retailers/ Shops: Free service for businesses to offer guests, additional amenity, drives traffic, increases sales

Public Transportation (Subways, Trains, Buses): Added safety & extra amenity that will increase ridership

Mobile Applications: People stop using mobile applications like Facebook and Instagram all together when their phones begin to lose battery/ are low on battery

Telecommunication companies: Carriers lose business when peoples phones die
